THE ~~SOBER~~ COCKTAIL RECIPE BOOK

A tribute to cocktail culture
currently endangered by
hydration, self-care, and
early mornings.

WHY DID WE REMOVE THE ALC.?

People are now counting steps, tracking their sleep and waking up at respectable hours. Some drink less because they're making healthier choices. Some drink less because they're not yet old enough to understand why happy hour was invented in the first place!

(We're not here to argue with that.)

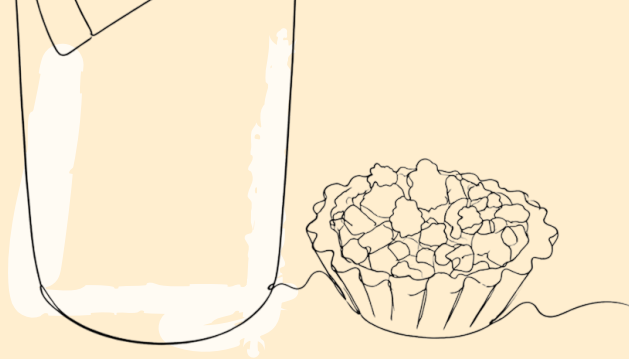

This is still a cocktail bar at its roots, and we'll always have a soft spot for drinks that come with a little mischief (we mean **alcohol** duh...). But we also understand that sometimes you want the ritual without the repercussions, the flavour without the fog, and the experience without tomorrow's apology and fake promises of quitting it forever.

Each drink is built with the same care, complexity, balance and creativity we'd give a cocktail. The only thing missing is the alcohol. Whether that's a good thing is entirely between you and your conscience.

No, these won't do what a cocktail does to your brain.
But they'll still give you something worth talking about.

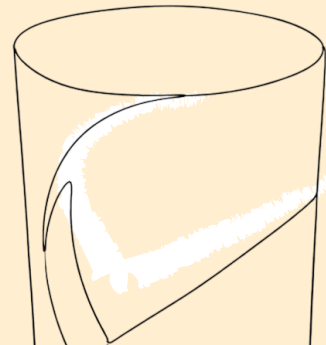

Welcome to the menu that mocks mocktails while secretly trying to make the best ones you've ever had.

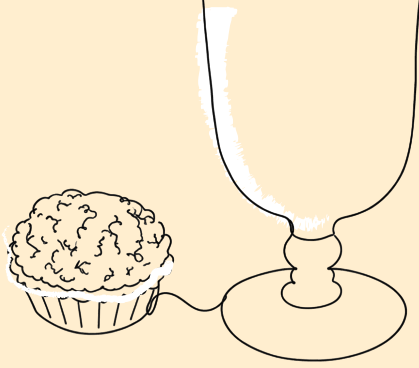

**THE ONE THAT
WANTED MEZCAL**

595+

Guava Sacchrum 30ml
